

Job Description – Clinical Application Specialist

Job title	<i>Clinical Application Specialist</i>
Reports to	<i>Regional Sales Director</i>

Job purpose

The Clinical Application Specialist supports sales with pre- and post-sales activities and provides feedback to R&D about customer needs.

Duties and responsibilities

The Clinical Application Specialist is responsible for:

- Performing product demonstrations in-person or via web
- Participating in sales & marketing events
- Performing user training
- Supporting customers when they have clinical or usability questions related to Combinostics' products
- Providing product feedback from the field to R&D

Qualifications

Required:

- Bachelor's or higher degree in a relevant field
- Minimum 3 years of experience as clinical application specialist or another teaching or training of clinical roles in the neuroscience field
- Ability to teach in a clinical setting and to present to groups of people
- Basic knowledge of medical imaging including MRI and PET
- Experience from working, or other documented knowledge, in a neurology area including neurodegenerative diseases
- Willingness to travel

Desired:

- Experience working with a public and/or private sector health provider
- PhD in a neuroscience area

Direct reports

No direct reports.

Location

We are primarily seeking a person based in the United States, ideally East Coast or Central, but we are also seeking a Clinical Application Specialist to support our European business with a location in the Nordics or Germany, but other locations can be considered.
