

**Join us in improving the quality of life for people suffering from neurological diseases!**

At Combinostics, we are driven by making a significant difference in the early detection and management of neurological disorders.

We believe that better use of AI-powered diagnostics and follow-ups for clinicians around the world is worth developing even further - ultimately providing people with better quality of life. We do this through our market leading Radiology & Neurology product suites. We already provide best-in-class early detection support and disease management of neurological diseases, such as Alzheimer's disease and multiple sclerosis (MS). Meanwhile, we continually develop the software to provide solutions for a wider spectrum of neurological diseases.

At Combinostics, we let industry specialists, creative developers and commercial teams come together and unleash their creativity. Together, we are building one of the most exciting software solutions for deployment in medical practices today. Having a proven product in the market already, the next step in our journey is to scale up our commercial activities.

We're now looking for a talented and passionate **Product Manager Radiology** to join us on our exciting journey to change the quality of life for patients around the world.

#### **ABOUT THE ROLE**

As part of the European Team expansion, we are looking for a **Product Manager Radiology**.

As Product Manager Radiology at Combinostics you will be expected to act as a market segment manager for radiology. You will represent the voice of the customer and business stakeholders within the organization, to create a compelling and competitive roadmap. Your work will ensure that our radiology solutions deliver unique value based on customer and market requirements. You will be accountable for the success of the products within your market segment and across the customer journey, in terms of successful adoption and usage. You will enjoy spending time in the field to understand the customer problems, and to determine innovative ways of solving these challenges while maximizing business outcomes.

The successful candidate resides in Europe and reports to the Combinostics CEO. This role is a remote-first role with frequent travel required.

#### **ABOUT YOU**

We put great emphasis on your personal characteristics. You are organized, proactive and flexible with a hands-on-mentality while also having a natural ability to collaborate across the entire Team. You already have a highly relevant and recent network in the field of Radiology.

You are motivated to perform with a sense of urgency in your role, contributing to your own results as well as the team's. You are flexible and sensitive to the views of others and find it fun when new ways of thinking take you to new solutions.

You are comfortable working in a hybrid work environment, making the best use of collaboration tools. At the same time, you thrive on interactions with both clients and colleagues and are open to travel as needed to maximize desired outcomes. You embrace the fast-moving, agile, and results-focused culture of a startup environment, offering unique opportunities for growth.

## **RESPONSIBILITIES**

- Developing an understanding of customer needs and articulating our product value accordingly
- Driving research and informing the organization of market trends, including actionable insights
- Analyzing market dynamics and competition to maximize potential opportunities
- Supporting our strategy by translating market segment needs into product specifications
- Producing an overall roadmap for the market segment
- Ensuring that product feedback and requests are integrated into our product planning
- Driving product prioritization and aligning the team in such work
- Working closely with marketing to support the development of go-to-market strategies
- Setting goals and objectives to measure the success of new products/features
- Acting as an ambassador for the Radiology product suite and as subject matter expert

## **WHAT'S NEEDED**

- BSc degree or similar
- Experience in a product management role for software development
- Know-how in or with marketing in successfully positioning and introducing new products
- Expertise with all parts of the product lifecycle from inception to development and launch
- Demonstrated ability to lead complex projects and initiatives from concept to delivery
- Experience of working cross-functionally with other internal teams
- Demonstrated ability to gather complex customer requirements and bring to R&D
- Strong project management skills with exceptional attention to detail
- Experience in a customer-facing role working with healthcare customers and clinicians
- Ability to excel in a dynamic, fast-paced environment
- Flexible, self-motivated and goal oriented
- Great collaborative, organizational & communication skills
- Readiness to participate in conferences
- Willingness to travel 40% to clients and company meet-ups
- Fluent in English

### *Desired:*

- Product management of a medical imaging software tool
- Experience from Radiology / Neurology
- Network in Radiology
- Used to working in an agile scale-up environment

## **WHAT WE OFFER**

- A unique opportunity to significantly contribute to the success of Combinostics
- Joining early in a multicultural company with ambitious global growth plans
- Competitive salary with added cash bonus
- An opportunity to become shareholder in Combinostics
- All equipment needed for your home office

## **WHO WE ARE**

The key to Combinostics' success is with our talented employees. Providing our employees with the best possible conditions for feeling good, having fun, being able to succeed and develop at work is an internal mission that drives Combinostics. Although we believe that technology is important for success in our work, we see that people are even more important. We believe that diversity and differences make us stronger as a Team and results in better solutions for our customers. Combinostics has offices in both Europe and the US, and we operate in a hybrid work environment.
